### PART A: PROMOTING PROPER NUTRITION

**SPECIAL DIRECTIONS OR NOTATIONS:**
- Oral/Nasogastric tube placement must be verified by the licensed nurse prior to each feeding.
- All 3 parts of this module must be successfully completed in order to complete this training module.
- Competency validation should occur in the clinical area whenever possible; however, in those limited situations where this is not possible, laboratory simulation of the clinical setting is permissible.
- Only the RN may provide nurse aide training and competency validation. The LPN may provide subsequent delegation and supervision when working with a nurse aide.

| 16 hours (Parts A, B, & C) | **PART A: PROMOTING PROPER NUTRITION**
  - Discuss the cultural factors which influence eating practice
  - Discuss six (6) nutritional habits that could influence adequate nutrition
  - Discuss four (4) physical signs that indicate poor nutrition
  - Discuss the following which could cause potential nutritional deficits:
    a. anorexia
    b. nausea
    c. vomiting
    d. projectile vomiting
    e. belching
    f. flatus
  - Describe three (3) measures for supporting nutrition in each of the following situations:
    a. infants/children
    b. pregnant/lactating clients
    c. visually impaired clients
    d. elderly clients | **A.** Common problems that influence eating
  1. Anorexia
  2. Nausea
  3. Vomiting
  4. Projectile vomiting
  5. Belching
  6. Flatus | Lecture/discussion | Written test |
| | **B.** Support of nutrition in special situations
  1. Infants/children
  2. Pregnant/lactating clients
  3. Visually impaired clients
  4. Elderly clients | | |
PART B: ALTERNATIVE METHODS FOR PROVIDING NOURISHMENT

SPECIAL DIRECTIONS OR NOTATIONS:
- Oral/Nasogastric tube placement must be verified by the licensed nurse prior to each feeding.
- All 3 parts of this module must be successfully completed in order to complete this training module.
- Competency validation should occur in the clinical area whenever possible; however, in those limited situations where this is not possible, laboratory simulation of the clinical setting is permissible.
- Only the RN may provide nurse aide training and competency validation. The LPN may provide subsequent delegation and supervision when working with a nurse aide.

| PART C: CLINICAL SKILLS | Discuss proper technique for adding enteral feeding to existing infusions | A. Addition of enteral feeding to existing Infusions.  
1. Verification of type of enteral feeding with nursing plan of care and nurse  
2. Measurement of residual and report to licensed nurse  
3. Administration of feeding per nursing plan of care  
4. Operation of feeding pump  
   a. turning on/off pump  
   b. initiating infusion  
   c. interrupting infusion  
   d. resuming infusion  
   e. checking occlusion alarm  
5. Tube placement and security  
6. Procedure for adding feeding (If a closed feeding system is used, adding feeding may not be permitted by agency.) | Lecture/discussion  
Laboratory demonstration and return demonstration of proper technique for adding enteral feeding to existing infusions | Written test  
Skills Checklist  
Competency Evaluation in clinical setting Part C: Clinical Skills Parts 1, 2, 3 |
| | Discuss proper technique for adding enteral feeding to intermittent tube, including bolus feeding | B. Addition of enteral feeding to intermittent tube  
1. Verification of type of enteral feeding with nursing plan of care and nurse  
2. Determination of residual  
3. Determination of amount of feeding | | |

|            | Identify the steps in clamping feeding tube | 1. Nursing plan of care and direction from nurse  
2. Equipment  
3. Procedure | Laboratory demonstration and return demonstration of proper technique for clamping enteral feeding tube | Laboratory demonstration and return demonstration of proper technique for discontinuing an enteral tube |
|            | Describe the procedure for discontinuing a nasogastric feeding tube | 1. Explanation to client  
2. Equipment  
3. Procedure  
4. Follow-up care | | |

PART 1: ADDING ENTERAL FEEDING TO EXISTING INFUSIONS

SPECIAL DIRECTIONS OR NOTATIONS:
- Oral/Nasogastric tube placement must be verified by the licensed nurse prior to each feeding.
- All 3 parts of this module must be successfully completed in order to complete this training module.
- Competency validation should occur in the clinical area whenever possible; however, in those limited situations where this is not possible, laboratory simulation of the clinical setting is permissible.
- Only the RN may provide nurse aide training and competency validation. The LPN may provide subsequent delegation and supervision when working with a nurse aide.

COMPETENCY STATEMENT: Demonstrates proper technique for adding enteral feeding to an existing infusion

CRITERIA:
1. Confirms enteral feeding tube placement has been verified by licensed nurse
2. Confirms rate of flow with licensed nurse
3. Gathers necessary equipment and supplies
4. Identifies client
5. Explains procedure to client
6. Confirms feeding tube is secured in place
7. Elevates head of bed
8. Verifies that feeding bag has been changed within past 24 hours
9. Washes hands
10. Checks residual to confirm amount of feeding falls within parameters specified by nurse
11. Cleanses enteral feeding container prior to opening
12. Adds feeding to existing infusion in an amount less than or equal to 8 hours of enteral tube feeding
13. Assures that infusion resumes at prescribed rate
14. Reports activity to licensed nurse
15. Documents information

This entire activity has been properly performed, without prompting and without assistance, by ____________________________

PART 2: ADDING ENTERAL FEEDING TO AN INTERMITTANT TUBE

SPECIAL DIRECTIONS OR NOTATIONS:
▪ Oral/Nasogastric tube placement must be verified by the licensed nurse prior to each feeding.
▪ All 3 parts of this module must be successfully completed in order to complete this training module.
▪ Competency validation should occur in the clinical area whenever possible; however, in those limited situations where this is not possible, laboratory simulation of the clinical setting is permissible.
▪ Only the RN may provide nurse aide training and competency validation. The LPN may provide subsequent delegation and supervision when working with a nurse aide.

COMPETENCY STATEMENT: Demonstrates proper technique for adding enteral feeding to an intermittent tube

CRITERIA:
1. Confirms enteral feeding tube placement has been verified by licensed nurse
2. Gathers necessary equipment and supplies
3. Identifies client
4. Confirms feeding tube is secured in place
5. Explains procedure to client
6. Elevates head of bed
7. Washes hands
8. Prepares feeding according to directions by licensed nurse
9. Checks residual to confirm amount falls within parameters specified by licensed nurse
10. Administers feeding by gravity flow
11. Flushes feeding tube with amount of water specified by licensed nurse
12. Clamps and secures tube
13. Documents feeding
14. Leave head of bed elevated for 30 minutes
15. Report client tolerance to licensed nurse

PART 3: DISCONTINUING AN ORAL/NASOGASTRIC (N/G) TUBE

SPECIAL DIRECTIONS OR NOTATIONS:
- Oral/Nasogastric tube placement must be verified by the licensed nurse prior to each feeding.
- All 3 parts of this module must be successfully completed in order to complete this training module.
- Competency validation should occur in the clinical area whenever possible; however, in those limited situations where this is not possible, laboratory simulation of the clinical setting is permissible.
- Only the RN may provide nurse aide training and competency validation. The LPN may provide subsequent delegation and supervision when working with a nurse aide.

COMPETENCY STATEMENT: Demonstrates proper technique for discontinuing an N/G tube

CRITERIA:
1. Obtains directions from licensed nurse
2. Gathers necessary supplies and equipment
3. Identifies client
4. Explains procedure to client
5. Elevates head of bed
6. Places towel or protective barrier across client's chest
7. Washes hands
8. Puts on gloves
9. Removes tape securing the tube
10. Positions emesis basin so it is accessible if needed
11. Asks client to hold breath
12. Quickly and steadily removes tube
13. Instructs client to resume breathing normally
14. Disposes of tube in appropriate waste receptacle
15. Removes and disposes of gloves
16. Washes hands
17. Confirms client comfort
18. Reports time that tube was discontinued and client tolerance to licensed nurse
19. Documents information
